We are at the end of the night of 5125 years; at the end of a galactic day of 26,000 years, at the point of entering the dawn of the galaxy

The era of change which the Maya called "the time of no time" was also prophesied by other cults and religions

All agree that the world is at the point of a change of huge proportions, soon after which will occur a period of chaos which will usher in a new phase of evolution of conscience and unprecedented changes in humanity
